

Job Opening: AI/ML Engineer

Location: LATAM Remote (Mexico, Colombia, Brazil)

Type: Contractor; Full-time

About the Role

We are looking for a hands-on AI/ML Engineer to design, build, and deploy AI-powered solutions and intelligent agents that automate business processes across Carnival Corporation. This role is focused on building real-world GenAI applications using LLMs, AI agents, RAG pipelines, and cloud-based AI services. The ideal candidate has strong software engineering skills combined with modern AI/LLM experience and is comfortable taking AI solutions from prototype to production.

This is a highly technical individual contributor role working closely with Data Engineers and business stakeholders.

What You'll Do

- Design and develop AI agents and multi-agent workflows
- Build GenAI applications using LLMs and RAG architectures
- Create AI-powered automations and intelligent business workflows
- Integrate AI solutions with APIs, enterprise systems, and cloud services
- Deploy and maintain AI applications in production environments
- Develop prompt engineering strategies and orchestration logic
- Monitor AI systems for performance, reliability, and quality
- Improve AI solutions based on business and production feedback
- Collaborate with Data Engineers to consume AI-ready datasets

Required Skills

Must-Have

- Strong **Python** development experience,
- 5 years of experience in **AI/ML engineering**, data science, or a closely related software engineering discipline
- Hands-on experience with **LLMs** and **GenAI** applications
- Experience with **LangChain, LangGraph, CrewAI, AutoGen**, or similar frameworks
- Experience building AI agents or agentic workflows
- Experience with **RAG** architectures and prompt engineering
- Experience with **Snowflake** Cortex AI / Snowflake ML and AI-ready data environments
- **AWS** cloud experience (**Bedrock**, SageMaker, ECS, S3)
- Experience deploying production applications and **APIs**
- Strong software engineering fundamentals

Nice-to-Have

- CI/CD and MLOps experience
- Containerized deployments (ECS, Docker, etc.)
- Multi-agent orchestration experience
- Experience working in enterprise environments

Ideal Candidate Background

We're looking for someone coming from roles such as:

- AI Engineer
- GenAI Engineer
- Applied AI Engineer
- ML Engineer
- Backend Engineer with GenAI experience
- AI Solutions Engineer

Tech Stack

- Python
- LangChain / LangGraph
- CrewAI / AutoGen
- AWS Bedrock
- Snowflake Cortex AI
- RAG Pipelines
- APIs & Integrations
- AWS Cloud Services
- CI/CD & MLOps
